

## Cisco IP phones will greatly enhance your employee productivity and customer care.

If you thought telephones were just for making and receiving calls...think again.

Cisco IP phones provide unmatched levels of integrated business functionality and converged communications features beyond today's conventional voice systems. The inherent IP intelligence enables businesses of all sizes to become more productive, efficient and successful through sophisticated, streamlined interactions both internally with employees and externally with partners and customers.

Cisco IP phones are an integral part of the comprehensive, enterprise-class IP Communications systems enabled by Cisco AVVID (Architecture for Voice, Video and Integrated Data).

The Cisco IP phone now becomes an instant link to sales reports, purchasing data, corporate calendars and travel services, as well as a tool for inventory management, point-and-click dialing and Web content delivery.

The result: Streamlined customer interactions and a satisfied customer base.

Cisco IP Phones

# Cisco IP Phones: Setting new metrics for **true VoIP**, display **capabilities** and **ease of use**.

Cisco IP phones maintain clear market leadership in true Voice over IP by delivering an exciting, distinctively stylish and complete IP phone portfolio to enterprise and small-to-medium sized customers. By providing display-based access to services and applications, Cisco IP phones enable customization, integration and Web access, connecting business processes and people to critical information.

Cisco IP phone products include a 2-port Ethernet switch interface that allows network administrators to manage voice quality by prioritizing voice network data over other network data types, and inline power support over Ethernet. Cisco IP phones provide efficient, secure operations and the features you need to enhance productivity and business communications.
